International Business Conference

2012

Sustainable Mining Development in Europe

*International Fair Plovdiv,
Plovdiv, Bulgaria*

24-25 September

MESSAGE FROM THE ORGANIZERS

DEAR COLLEAGUES,

In 2010, the first of its kind International Business Conference on Sustainable Mining Development in Central and Eastern Europe was held at the initiative of the Bulgarian Chamber of Mining and Geology in partnership with the Ministry of Economy, Energy and Tourism and the European Association of Mining, Metal Ores and Industrial Materials, in which over 150 participants from 13 countries took part.

The main goal of the Conference was to outline different approaches and concepts for achievement of the global goals of the mineral and raw material industry, to discuss issues and point out good practices. The forum gathered together representatives of institutions responsible for the sector, of professional organizations, of business, of science, of non-governmental organizations at both national and European level.

Today, two years later, after we raised the issues of mining industry in an open way and discussed them with stakeholders, it is the time to offer for discussion solutions to achieve sustainable development of the sector, and of the regions where the enterprises operate, respectively.

We have the pleasure to invite you to participate in the second International Business Conference on Sustainable Development of Mining in Central and Eastern Europe. Let us continue jointly the dialogue we have already started regarding the future of the sector, which is the ground of all other industries and is essential for the existence of the mankind.
